

Hi everyone,

It was great to see so much interest and engagement at the MPS workshop. Thanks again for joining my session. I hope it gave you some ideas for your own research! I'd love to continue the discussion, so please feel free to reach out to [customerservice@insphero.com](mailto:customerservice@insphero.com).

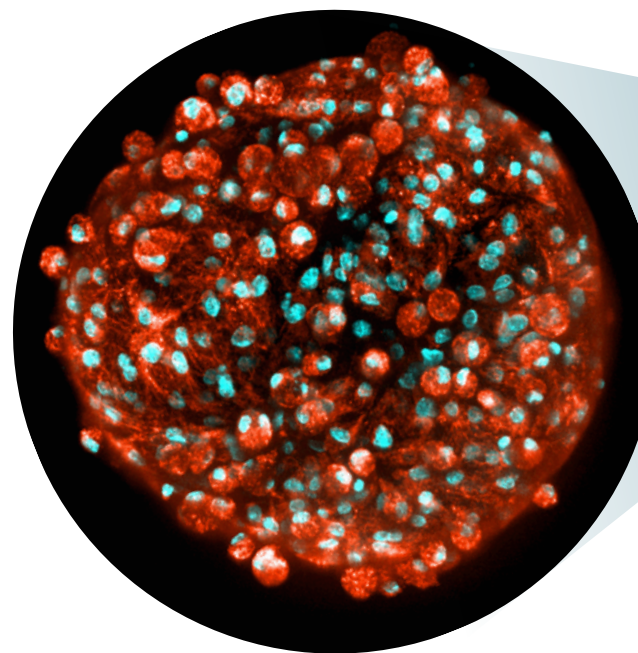

The conference was packed with information, so here's a quick recap and two brochures for reference:

I shared how we're adding immune competence to our 3D in vitro models, how immune-tissue interactions can be recapitulated in the Akura™ Immune Flow Platform, and how the Akura™ Twin Platform enables co-culture of two different tissues plus immune cells to study complex mechanisms such as immune-mediated DILI by bispecific antibodies.

- [3D Cell Culture Tools brochure](#)

Looking forward to hearing from you!

Best regards,  
Lisa
